

Extension of Deadline

Request for Proposals: Consultancy Services for Water Network Development: Leak Detection and Remediation in Tortola, British Virgin Islands

RFP Number: RDA/RFP/2024/003/QCBS

Background:

The water supply within the British Virgin Islands (BVI) has been a challenging resource to manage for a considerable period of time. For years the Water and Sewage department has run at a deficit, with Government subsidizing the production of water. Metering and demand management are not well developed which results in a reactive response to water supply issues. The primary objective of this project is to conduct capacity development of local contractors and the Water and Sewage Department in improving leak detection and remediation within the BVI. This assignment consists of the following 4 main components:

- i. Training for the for the identification of leaks within the portable water infrastructure.
- ii. Provision of equipment for the ongoing leak detection by the Water and Sewage Department.
- iii. Leak detection activity
- iv. 12-months post training support

The RDA now invites Proposal from eligible and qualified **consulting firms** to submit technical and financial proposals for water network development: leak detection and remediation in Tortola, British Virgin Islands.

The Procurement method will be conducted through the Quality and Cost Based Selection (QCBS) process.

The full Request for Proposal package including the detailed Terms of Reference can be obtained by sending a request to the Procurement Team at: procurement@bvirecovery.vg
